Python program to get all phone numbers of redbus.in by using web scraping and regular expressions

```python
import re,urllib

import urllib.request

u=urllib.request.urlopen("https://www.redbus.in/info/redcare")

text=u.read()

numbers=re.findall("[0-9-]{7}[0-9-]+",str(text),re.I)

for n in numbers:

    print(n)
```
